Absolutely love your portraits or your money back!!
No questions asked and no hard feelings.

With a little preparation and planning, you can create the perfect portrait.

Clothing and colors are very important factors. If you select and coordinate the right tones, fashions, and background setting, your portrait will be pleasing to the eye. It will have the sense of harmony and balance.

Be Consistent. Choose colors in the same tonal range so that no single member stands out. **Avoid** busy patterns and contrasting tone. **DO** relax and have fun!!

All portrait reprints are enhanced and retouched.

Tax will be added in addition to all Prices.
